

Sodium fluoride powder

Sodium Fluoride Parameters and Specifications

Packaging specifications: 500g/bottle, 25kg/barrel

Appearance: white crystalline powder

Properties: soluble in water, slightly soluble in ethanol

CAS No.: 7681-49-4

Melting point: 993 °C

Density: 1.02g/cm³

Refractive index: 1.336

Validity period: three years

Storage conditions: Sealed and moisture-proof

Reminder: Sodium fluoride is weakly alkaline, fluoride salt is toxic, hydrofluoric acid will be generated when sodium fluoride is hydrolyzed, and it will corrode glass and other silica-containing containers, so store tightly in plastic containers only.
